Tom Morgan

Professional Summary

A development lead with 11+ years' experience, primarily for Accenture, passionate about visualisation and AI to facilitate and accelerate data driven decision making.

Experience:

Accenture projects (selected)

RAF

- Developing multiple visualisation POC's in Tableau and Palantir Workshop including Operational Planning reporting proposal
- Leading team in investigating data pipeline and architecture for Product Analytics reporting

NHSE / Palantir

- Working with Palantir to support report migration for the NHSE, specifically a Foundry Workshop dashboard highlighting patient waiting times
- In addition to dashboard development, I also took on business analysis tasks, supported data engineering, led team meetings and demoed to NHSE leadership

United Nations Global Compact

- Leading Tableau developers to build and enhance dashboards to indicate external companies' sustainability policies
- Creation of operating model for strategic planning of visualization

Scottish Power

- Initially came into the team as a Visualisation expert to help build PowerBI Dashboards within Scottish Power Complaints
- Subsequently required to lead the team and manage deliverables including assessing Goodwill reporting and ombudsman risk

Accenture Supply Chain Decarbonisation Suite

- Leading teams of data scientists to build Gen AI solutions focussing on enhancing Sustainability processes by reducing manual effort by circa 90%

Lloyds Banking Group

- **Project 2** - Directing development of Power BI dashboards to report on board level metrics, and demoing to senior leadership
- **Project 1** - Development of data quality dashboards in Tableau, leading production of developed product and training for handover

UK Health Security Agency

- Supporting the UKHSA with the covid-19 pandemic
- Assisting the Head of Visualisation on key strategic planning and helping direct the team
- Undertaking and directing on dashboard development and delivering marketing and training sessions and artefacts to upskill the business in Qlik Sense

Previous companies (selected)

- **A.S. Watson** (*health and beauty retailer*) - Construction and implementation of Tableau reports across Europe and Asia Business Units
- **New Look** (*fashion retailer*) - Engineering data in SQL and Tableau dashboard development for business-wide use

Personal ventures

- Founder of [MyBigClub.com](https://mybigclub.com), a website that uses data to determine which football club is the biggest in England
- Created several mobile games and published them to Google Play. The games have been built using Unity and HTML
